BARTOSZ MAZUREK

EXPERIENCE

Railwaymen — *Product Manager / Product Owner*

February 2019 – Currently

- Leading agile development teams through all stages of product – from the conception and ideation, through the MVP development up to succesful release and iterative updates on live environment.
- Facilitating design thinking workshops with customers, their stakeholders and internal teams
- Acting as a link between clients, design and technical teams by defining and maintaining product backlog in an agile environment.
- Mentoring other PMs and improving internal processes related to agile development, workshops, backlog definition and product refinement.
- Introducing customers to more robust analytics and data driven approach.
- Acting as JIRA admin for the whole company and automating/streamlining internal processes.

Some of the examples and numbers from my work at Railwaymen:

- Taking an existing mobile product from 1500 MAU to around 350,000 MAU and over 3 million downloads.
- Developing an automation solution which allowed the customer to grow their subscriber numbers over 10x without needing to expand their team.
- Facilitated over 350 hours of design thinking workshops and processes in 7 different projects.

Jaksiemasz.care — *Product Owner*

December 2017 – February 2019

For over a year I was one of the leaders of the Jaksiemasz.care project - the Cracow school of programming, which helps students enter the job market through the creation of social projects. In the initiative I was responsible for:

- Defining requirements and user stories, acting as PO for mobile teams
- Organizing meetings and events with the team
- Recruiting new team members and promoting the project
- Finding ways of expanding the project by obtaing funding and partnerships

During my time with the Jaksiemasz.care, we have:

- Doubled the size of the initiative by cooperating with local comapnies and universities
- Supported the team of 20-25 people, both developers and UX/UI designers
- Helped over 40 young programmers to get experience and find their first work - that's over 90% success rate

Fideltronik — *Automation Engineer*

January 2018 – February 2019
